EDUCATION

CHRIST (Deemed to be University)

Master of Computer Applications

Bangalore, Karnataka

July 2024 – May 2026

St. Joseph's College (Autonomous)

Bachelor of Computer Application

Bangalore

August 2020 – May 2023

EXPERIENCE

Software Engineering Intern

Corestrat.ai

Jan 2026 – Mar 2026

Bangalore, Karnataka

- Led end-to-end migration of a legacy **Electron** desktop app to a scalable **React/TypeScript** web platform, modularizing architecture across 10+ feature components.
- Architected centralized state management using **Redux Toolkit** and **RTK Query**, eliminating redundant API calls and enforcing backend-authoritative UI consistency.
- Engineered an Advanced Dataflow Builder with topological sort execution, enabling dynamic pipeline configuration for data engineering workflows.
- Integrated 15+ **RESTful APIs** in collaboration with a **FastAPI** backend team, resolving 4 critical production bugs and ensuring zero post-release regressions.
- Performed API testing, debugging, and validation using **Postman** to maintain stable and efficient deployments.

Freelance Web Developer & Digital Marketing Specialist

Eljay Medical Staffing India Pvt. Ltd.

Jun 2020 – Present

Bangalore, Karnataka

- Built a full-stack invoice generation system using **Node.js/Express** and **MongoDB**, automating billing workflows and eliminating manual documentation processes.
- Developed a webinar registration tool with **Razorpay** payment integration and **Google Sheets** automation for end-to-end event management.
- Managed brand presence across LinkedIn, Instagram, and Facebook; delivered campaign analytics that improved audience engagement through targeted content strategies.

PROJECTS

Health Inspector | React, Bootstrap, Python FastAPI

- Built a barcode-scanning web app that evaluates product health risk scores using a custom **FastAPI** scoring engine and REST endpoints for real-time ingredient analysis.

ScholarWise | React, TypeScript, Node.js, MongoDB

- Developed an AI-powered scholarship discovery portal with personalized recommendations, full-stack **MERN** architecture, and user authentication.

SplitUp | React, TypeScript, Firebase, Tesseract.js, PWA

- Engineered a mobile-first **Progressive Web App** for restaurant bill splitting with real-time sync via **Firebase Firestore**.
- Integrated **Tesseract.js OCR** to automatically parse receipts, reducing manual data entry by ~80%.

LEADERSHIP EXPERIENCE

Committee Head

Gateways 2025, Christ University

September 2025

Event Core Team

XeBit 2024, Christ University

December 2024

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, PHP, C/C++, R

Frontend: React.js, Next.js, Redux Toolkit, RTK Query, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI

Backend & APIs: Node.js, FastAPI, Express.js, REST API Design & Integration, API Testing

Databases & Cloud: MongoDB, Firebase, MySQL, PostgreSQL, NoSQL, Microsoft Azure

Developer Tools: Git, GitHub, Docker, VS Code, Android Studio, NPM, Postman

Core Concepts: State Management, Web App Migration, Agile/Scrum, Performance Optimization, Debugging
